PROFILE

Trainer specialized in the MERN stack, passionate about turning complex concepts into clear, hands-on learning experiences that actually stick. My path started in Electrical Engineering at JUST — which gave me a systems-thinking mindset I still use every day in the classroom. From there, I moved into QA Engineering, where I learned that understanding how things break is just as important as knowing how to build them.

WORK EXPERIENCE

TECHNICAL INSTRUCTOR

Digital Opportunity Trust (dot.Jordan).
Jan 2026 - Present

Technical Instructor, mentoring students from foundational programming concepts to building full-stack MERN applications. Responsible for delivering hands-on technical training, guiding students through real-world projects, and conducting interactive educational activities focused on problem-solving, teamwork, and practical development skills.

OPERATION ASSISTANT

Meraki Academy (Full time)
Jun 2025 - Jan 2026

Responsible for organizing and managing schedules, preparing all academic and logistical requirements for upcoming student cohorts, delivering instructional sessions and lectures, and conducting student interviews and assessments to support placement and readiness.

TEACHER ASSISTANT/INSTRUCTOR

Meraki Academy (Part time)
Aug 2024 - Jun 2025

Supported the delivery of engaging coding lessons and provided personalized assistance to students by troubleshooting code issues and clarifying programming concepts. Graded assignments with detailed, constructive feedback and led HR interview preparation sessions to help students succeed in the job market.

QUALITY ASSURANCE ENGINEER

Jo-Students Academy
Jul 2024 - Mar 2025

- Created and executed test cases and scenarios based on product requirements for manual and automated testing. Utilized Cypress for automated test scripts for web applications, conducted API testing using Postman and integrated API tests into CI/CD pipelines. Reported and tracked bugs using Trello and Excel, ensuring timely resolutions and improved product quality.

EDUCATION

Jordan University of Science and Technology
2019 - 2023
Electrical Engineering\ wireless communication

CERTIFICATIONS

- 22-week Immersive Full-Stack Web Development Bootcamp, with over 400+ hours of coding, building projects, and solving problems.
